

IS WAS THE FIRST YEAR FOR THE HAM RADIO CLUB.

Not high wire acrobats, they're just a couple of the Radio Club members assemble a very high antenna. The daring boys from the radio club are Rusty Epps and John Fradella. Let's be careful boys, it's a long way down.

Wires, knobs, and switches help to make the operation of working with the radio very fascinating agree John Fradella and John Laney, radio club members. By the expression they have on their faces they must have contacted the planet Mars.

- President John Laney
- Vice President John Fradella
- Secretary Rusty Epps
- Treasurer Harvey Mills

Do you know your Morse Code? Here is one group, the CHS Amateur Ham Radio club, that has to be at least familiar with the code to be able to operate their radios. Organized this year, their purpose is to promote interest in amateur radio communication and experimentation. Since the beginning of the club some of the members have become licensed ham radio operators, operating their own sets. Mr. O'Neal Hendricks and Mr. Herman Dollar were advisors.

Amateur ham radio enthusiasts may be the leading radio and television technicians of tomorrow. They are—FIRST ROW, L. to R: Don Rogers, John Fradella, Harvey Mills, John Laney . . . SECOND ROW: Ronald Boyette, Hyman Kaplan, Morgan Self, Johnny Greer, and Mr. Herman Dollar, co-advisor with Mr. O'Neal Hendricks.
